

## MATH 1B DISCUSSION SECTION

DAN BERWICK EVANS

**Quizzes:** There will be a quiz every Friday on the material covered the previous week (the previous Friday through Wednesday). Additionally there will be *short* pop quizzes approximately once per week covering fundamental concepts. There will be no make-up quizzes, but in computing section grades 2 quizzes and 2 pop quizzes can be dropped.

**Homework:** Homeworks are to be handed in by groups of 2-4 students. Each member must complete the assignment individually and submit separate work. However, the group's score for a particular problem will be determined by grading a single member's work. Additional problem sets will be assigned periodically, primarily for exam review. Two homeworks can be dropped.
