

Corrections to “Geometrization of three-dimensional orbifolds via Ricci flow”

Thanks to Hong Huang for the following corrections.

- p. 107, line 3, the homomorphism need not be surjective.
- p. 109, line 6, $I \times (D^n // \Gamma)$ should be replaced by $I \times \partial(D^n // \Gamma)$.
- p. 118, line 19, the local lifts of the curve should be part of the data.
- p. 145, line 15, the volume bound needs an assumption $|G_p| \leq N$, as in Lemma 6.23.
