

Math 1A, Homework 11, due Friday 04/15/2011

I'm happy to say that scores on the second midterm were better than those on the first. The median score was 74. To give you an idea of the curve: 86–100 is an A, 74–85 is a B, and 45–74 is a C. (Once again, the letter grades here are just advisory. In the end, all course points will be totalled together, and your grade determined using the total.)

We'll cover 5.1–5.3 in lectures this coming week. The definition of the definite integral (box (2), page 366) is one of the most important definitions in the course. The Fundamental Theorem of Calculus (page 387) is the main theorem of the course.

Homework to hand in:

Section 5.1: 2, 5, 11, 15, 19, 21.

Section 5.2: 11, 18, 21, 23, 30, 34, 36, 43, 44, 47, 51, 52.
