1B Midterm 1 Statistics (001)

Here are the basic statistics from the first midterm. The table shows the scores which are each percentile boundary. For example the 80th percentile is 105/125. This means that 20% of the class received 105 or above. The 50th percentile is where the median is, so exactly half the class scored 84.5 or above. Also indicated are the rough grade boundaries if your grade was to be decided on this test alone. Remember your final letter grade is only determined once all your scores have been compiled so don't take these predictions too seriously.

As indicated in the course policy if you're relative score in the final (i.e the percentile) is higher than your relative score in the lowest midterm it will replace it in your final grade computation.

100th Percentile	125	
95th Percentile	120	
90th Percentile	113.5	
85th Percentile	108	
80th Percentile	105	
75th Percentile	101	
70th Precentile	97.5	Rough B+/A- Boundary
65th Percentile	93	
60th Precentile	91	
55th Percentile	87	
50th Precentile	84.5	
45th Percentile	80.75	
40th Precentile	79	
35th Percentile	75	
30th Precentile	70.5	Rough C+/B- Boundary
25th Percentile	67	
20th Precentile	62	
15th Percentile	56	Rough D+/C- Boundary
10th Precentile	47	

5th Percentile	31	
0th Precentile	8
