

# Probabilistic Operator Algebra Seminar

Organizer: Dan-Virgil Voiculescu

October 26    **Dan-Virgil Voiculescu**, UC Berkeley

Title: *On the  $K$ -theory of the commutants mod trace-class in the case of hermitian and unitary operators.*

The talk will be about how the commutants mod trace class of hermitian and unitary operators relate to classical results about their trace class perturbations. Hints at generalizations and open problems will be included.
