# Math 1B: Discussion 4/5/19 

Jeffrey Kuan
April 5, 2019

Directions: Draw direction fields for the following first order differential equations.

## Integrable Ordinary Differential Equations

$$
\left(1+x^{2}\right) \frac{d y}{d x}=1
$$

## Separable Ordinary Differential Equations

$$
\begin{aligned}
& \left(1+x^{2}\right) \frac{d y}{d x}=y \\
& x^{2} \frac{d y}{d x}-y=0 \\
& \frac{d y}{d x}=\cos ^{2}(y) \\
& \frac{d y}{d x}=\sec (y) \\
& \frac{d y}{d x}=\sqrt{1-y^{2}}
\end{aligned}
$$

(Note the last three in this group are more specifically autonomous differential equations, since they only involve $y$ ).

## First Order Linear Ordinary Differential Equations

$$
\begin{aligned}
& \frac{d y}{d x}+\frac{y}{x}=x \\
& \frac{d y}{d x}+\frac{y}{2 x}=1
\end{aligned}
$$
