CORRECTIONS TO “LOCALLY COLLAPSED 3-MANIFOLDS”

Thanks for Thunwa Theerakarn for the following corrections.

1. End of proof of Corollary 6.5 : the interval (0, 3] should be replaced by (0, 1 + 2Λ].

2. Proposition 14.1(2) : the possibility $D^3$ should be added to the list.

3. End of proof of Lemma 20.2 : the basepoints $x_j$ should all be moved to the origin, and $x_\infty$ should be taken to be the origin. The limit should read $\lim_{j \to \infty} \left( \frac{1}{r(x_j)} \tilde{S}_j, x_j \right)$ (instead of $\lim_{j \to \infty} \left( \frac{1}{r(x_j)} S_j, x_j \right)$).
