

# Math 136, Homework 6, due Thursday March 5

I will have office hours Wed. Feb. 26, 2–3:30pm. (This is the day before our midterm.) There will be no office hour Thurs. Feb. 27. After this, we'll go back to the usual times.

We shall skip sections 6.2–6.5 for now. (Later, we shall come back to 6.5, and do it all more carefully than is done in the book. The other sections are worth reading; not much is proved, it's just a discussion of some big theorems.)

We shall start on Chapter 7 next week, March 3 and March 5. After we finish Chapter 7, we'll skip to Chapter 11. After that, we'll go back to Chapter 8.

Exercises due March 5:

From Chapter 6: 6.14 (page 119) 4, 5, 8, and 9.
